BEME HULL GRIP

The easy way of mounting/replacement of hull sacrificial anodes

BEME HULL GRIP on vessel

BEME HULL GRIP offers you the following advantages:

- After mounting of BEME HULL GRIP there is no need for hot work when replacing anodes. The anode is fixed by 2 bolts.
- The anode is mounted after coating of the hull, and you thereby avoid time consuming masking and unmasking of the anode.
- Easier to replace anodes for divers (when replacing without docking)

BEME HULL GRIP is equipped with special threads in order to avoid any loss of bolt load due to vibrations

The patented "BEME-OMI" design.
"BEME ONE MAN INSTALLATION"
 mounting of ballast tank anodes effortlessly
